IUS CCDC LAB

Welcome to the IUS CCDC Lab!

Click that you have completed this inject to confirm that your team is ready to compete. To create a response for this, your team will need to create a formal business email in a PDF format. All other formats will not be accepted. This is true for all injects in this lab.

Scoring is done by the team keeping services up to the public. When a service fails, it is the responsibility of teams to find out why and resolve the issue.

Responses to injects are also used for scoring in CCDC. However, this lab only tracks service uptimes for scoring. Teams using this lab will have to create inject responses and discuss them with their team and team sponsors to determine how they responded and what their improvement areas are.

We hope your team does well in this competition!
